CLIMATE TRANSPARENCY REPORT

2019

AP6

About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2019 PRI Reporting Framework.

About this report

This report is an export of only the climate-related indicators from the 2019 Reporting Framework response. The full Public Transparency Report is available here (https://reporting.unpri.org/surveys/PRI-reporting-framework-2019/-9BB195FD-0F24-4469-8749-86E005917694/00000000-0000-0000-0000-000000000000/doc/2/-%7C%7C*complete*%7C*public*/Merged/). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2019 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

New selection options have been added to this indicator. Please review your prefilled responses carefully.

SG 01.1

Indicate if you have an investment policy that covers your responsible investment approach.

Yes

SG 01.2

Indicate the components/types and coverage of your policy.

Select all that apply

Policy components/types	Coverage by AUM
<input checked="" type="checkbox"/> Policy setting out your overall approach <input checked="" type="checkbox"/> Formalised guidelines on environmental factors <input checked="" type="checkbox"/> Formalised guidelines on social factors <input checked="" type="checkbox"/> Formalised guidelines on corporate governance factors <input checked="" type="checkbox"/> Fiduciary (or equivalent) duties <input type="checkbox"/> Asset class-specific RI guidelines <input type="checkbox"/> Sector specific RI guidelines <input checked="" type="checkbox"/> Screening / exclusions policy <input checked="" type="checkbox"/> Other, specify (1) Active ownership / engagement policy <input type="checkbox"/> Other, specify(2)	<input checked="" type="radio"/> Applicable policies cover all AUM <input type="radio"/> Applicable policies cover a majority of AUM <input type="radio"/> Applicable policies cover a minority of AUM

SG 01.3

Indicate if the investment policy covers any of the following

- Your organisation's definition of ESG and/or responsible investment and it's relation to investments
- Your investment objectives that take ESG factors/real economy influence into account
- Time horizon of your investment
- Governance structure of organisational ESG responsibilities
- ESG incorporation approaches
- Active ownership approaches
- Reporting
- Climate change
- Understanding and incorporating client / beneficiary sustainability preferences
- Other RI considerations, specify (1)
- Other RI considerations, specify (2)

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

AP6's mission is to generate a long-term high return with adequate risk diversification. Sustainable development is fundamental to the well-being of future generations, i.e. future beneficiaries of AP6, as well as fundamental to the creation of wealth. AP6's basic outlook is that good business ethics, along with environmental, social and economic sustainability are prerequisites for running a business successfully and generating a high return.

AP6's role in the Swedish AP pension system is to invest in the Private Equity (PE) market, which is the market for unlisted assets. Investing in unlisted companies requires specialist expertise and well-developed models for exercising the role of active owner. AP6's investment strategy is based on combining specialist expertise in order to invest both indirectly (through external funds) and directly in unlisted companies.

AP6 has signed the UN Principles for Responsible Investment (PRI) along with the ten principles of the UN Global Compact. According to AP6's investment policy and ownership policy, AP6 commits to integrating sustainability into its investment activities. This involves follow-up and evaluation in line with accepted international conventions in the areas of human rights, labour rights, environment and anti-corruption. AP6's Code of Conduct and ownership policy specifies the approach to responsible investment.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

AP6 has developed processes to uphold the principles for responsible investment (PRI), including the integration of ESG in selection, appointment and monitoring of both direct and indirect private equity holdings. The most important parts relate to ESG due diligence before investing, and ESG monitoring during the life of the investment.

AP6's Code of Conduct and Ownership Policy details AP6's responsible investment approach. In the Code of Conduct, AP6 has committed to ensuring that the companies and funds it has invested in:

- Respect human rights and are not involved in any abuses of human rights
- Respect and maintain the freedom of association and right to collective bargaining
- Are not involved in forced labour or child labour
- Respect the principle of non-discrimination
- Minimize their use of resources and any negative impact on the environment
- Contribute to solutions on global environmental challenges
- Identify and take action on climate-related risks and opportunities
- Counteract all forms of corruption, including extortion and bribery

No

SG 01 CC

Voluntary

Public

Descriptive

General

**SG 01.6
CC**

Indicate the climate-related risks and opportunities that have been identified and factored into the investment strategies and products, within the organisation's investment time horizon.

Climate change challenges the basis of economic prosperity through undermining the climate stability necessary for human life and activity. For AP6, as part of the Swedish public pension system, tasked with the provision of pensions to future pensioners, climate related physical and transitional risks can negatively affect long term returns. Likewise, climate related opportunities can positively affect returns. Therefore, considering climate change related effects on AP6's investments is required and prioritised.

Which these climate-related risks and opportunities are depend on the nature of the investment. For some companies extreme weather events can cause interruptions in the value chain. Rising temperatures can affect raw material prices and thus the cost of production. Other risks include a forceful policy response through e.g. a high price on carbon emission and brand reputation risks. Climate-related opportunities span across cost savings through energy efficiency, taking advantage of changing consumer preferences towards sustainable business practices, and product innovation.

Climate related risks are factored into investment strategies through the integration in due diligence and monitoring of direct investments as well as indirect investments.

Furthermore, AP6 typically avoids investments in fossil fuel on the basis of climate change and the transition to a low carbon economy. As per 31st December 2018, energy related investment accounted for 1.7 % of the value of AP6's PE portfolio.

**SG 01.7
CC**

Indicate whether the organisation has assessed the likelihood and impact of these climate risks?

Yes

**SG 01.8
CC**

Indicate the associated timescales linked to these risks and opportunities.

The likelihood and impact of climate change related risks are assessed in due diligence of investments. In these assessments, likelihood and impact during the holding period of the investment, and exit potential is considered.

AP6 has not, as of yet, analysed the likelihood and impact of climate-related risks in the total portfolio.

No

**SG 01.9
CC**

Indicate whether the organisation publicly supports the TCFD?

Yes

No

**SG 01.10
CC**

Indicate whether there is an organisation-wide strategy in place to identify and manage material climate-related risks and opportunities.

Yes

Describe

AP6 has since 2015 an internal strategy for

- 1) increasing awareness regarding climate-related risks and opportunities in the investment portfolio
- 2) increasing carbon transparency in the investment portfolio (encouraging measurement and reporting of carbon emissions where material)

During 2019, AP6 plans to review the strategy from 2015 to include a more forward looking approach aligned with the TCFD recommendations.

No

- Assessment and management of climate-related issues
- No responsibility for climate-related issues

SG 07.6 CC	For board level roles for which have climate-related issues oversight/accountability or implementation responsibilities, indicate how these responsibilities are executed.
-----------------------------	--

AP6 board of directors has set climate related targets regarding carbon transparency as well as climate related strategy and risk management. Performance in relation to the targets is assessed annually and presented to the board of directors.

Climate-related risks and opportunities are an integrated part of AP6's investment process. Due diligence of direct and indirect investments should include climate change due diligence as appropriate. When climate-related aspects of an investment are material, this should be part of the decision material presented to the investment committee, and ultimately, to the board of directors before investment.

AP6 furthermore carries out an annual climate analysis of the portfolio, including a carbon footprint of the portfolio, which is presented to the board of directors on an annual basis.

SG 07.7 CC	For the management-level roles that assess and manage climate-related issues, provide further information on the structure and process involved.
-----------------------------	--

Climate related risks and opportunities are an integrated part of AP6's investment process and thereby part of the oversight responsibilities of management level roles, specifically CIOs and Deputy Managing Director, who is responsible for responsible investments on a management level.

Due diligence of direct and indirect investments should include climate change due diligence as appropriate. When climate related aspects of an investment are material, this should be part of the decision material presented to the investment committee (management level), and ultimately, to the board of directors.

AP6 board of directors has set climate related targets regarding carbon transparency as well as climate related strategy and risk management. Management is responsible for the oversight of activities enabling the performance against those targets, through assigning an annual climate analysis of the portfolio, which includes a carbon footprint of the portfolio.

SG 07.8 CC	Explain how the organisation engages external investment managers on the TCFD recommendations and its implementation.
-----------------------	---

- Incorporation of TCFD in Annual Report
- Incorporation of TCFD in regular client reporting
- Request that investment managers complete PRI Climate indicators
- Request responses to TCFD Fund Manager questions in the PRI Asset Owner guide

ESG issues in asset allocation

SG 13	Mandatory	Public	Descriptive	PRI 1
--------------	------------------	---------------	--------------------	--------------

SG 13.1	Indicate whether the organisation undertakes scenario analysis and/or modelling and provide a description of the scenario analysis (by asset class, sector, strategic asset allocation, etc.).
----------------	--

- Yes, to assess future ESG factors
- Yes, to assess future climate-related risks and opportunities
- No, not to assess future ESG/climate-related issues

SG 14	Mandatory to Report Voluntary to Disclose	Public	Additional Assessed	PRI 1
--------------	--	---------------	----------------------------	--------------

SG 14.1	Some investment risks and opportunities arise as a result of long term trends. Indicate which of the following are considered.
----------------	--

- Changing demographics
- Climate change
- Resource scarcity
- Technological developments
- Other, specify(1)
- Other, specify(2)
- None of the above

SG 14.2	Indicate which of the following activities you have undertaken to respond to climate change risk and opportunity
----------------	--

- Established a climate change sensitive or climate change integrated asset allocation strategy
- Targeted low carbon or climate resilient investments
- Phase out your investments in your fossil fuel holdings
- Reduced portfolio exposure to emissions intensive or fossil fuel holdings
- Used emissions data or analysis to inform investment decision making
- Sought climate change integration by companies
- Sought climate supportive policy from governments
- Other, specify

	other description
--	-------------------

Integration of climate-related risk and opportunity in due diligence and monitoring

None of the above

SG 14.3

Indicate which of the following tools the organisation uses to manage climate-related risks and opportunities.

- Scenario analysis
- Disclosures on emissions risks to clients/trustees/management/beneficiaries
- Climate-related targets
- Encouraging internal and/or external portfolio managers to monitor emissions risks
- Emissions-risk monitoring and reporting are formalised into contracts when appointing managers
- Weighted average carbon intensity
- Carbon footprint (scope 1 and 2)
- Portfolio carbon footprint
- Total carbon emissions
- Carbon intensity
- Exposure to carbon-related assets
- Other emissions metrics
- Other, specify

other description

Engagement with companies and asset managers on climate change related risks and opportunities.

None of the above

SG 14.4

If you selected disclosure on emissions risks, list any specific climate related disclosure tools or frameworks that you used.

- Portfolio carbon footprint
- Weighted average carbon intensity

SG 14.8 CC	Indicate whether climate-related risks are integrated into overall risk management and explain the risks management processes for identifying, assessing, and managing climate-related risks.
-----------------------	---

☉ Process for climate-related risks is integrated into overall risk management

Please describe

AP6 carries out an annual risk assessment, where each risk and its risk driver are analysed. The likelihood of materialisation of each risk, as well as the impact of such is discussed together with an assessment of mitigating factors. Finally the level of net risk is assessed and confirmed. Management reports the result of the risk assessment to the audit committee, and in relevant cases to the sustainability committee, of AP6's board of directors.

Specifically regarding sustainability risks, these are primarily related to the investment portfolio and can entail a number of risks depending on e.g. sector and geography, including the risk of breaches of international norms on human rights, labour rights or anti-corruption, risk for environmental degradation or climate change risk. AP6 manages sustainability risk in the portfolio, based on AP6's Code of Conduct and ownership policy, through systematic diligence and monitoring of investments from a sustainability perspective. The annual adoption (by the board of directors) of specific sustainability goals further contributes to managing sustainability risk.

Since 2015, AP6 carries out an annual climate analysis of the portfolio, including a carbon footprint. Another feature of the climate analysis has been an in-depth analysis of how companies and private equity funds are managing the issue of climate change in their activities and investments. The conclusion of the analysis is on the one hand that AP6's portfolio is not carbon intensive, mainly due to sector focus, and on the other hand that there is a need for raising awareness about climate related risks and increasing climate transparency at individual investees. The annual climate analysis is presented to the board of directors, which annually sets sustainability targets for AP6, including targets relating to climate change. Medium and long-term climate risk is mainly mitigated through awareness building and through promoting climate transparency.

AP6 has further integrated climate change into the ESG due diligence and monitoring of companies and PE firms as a means of detecting climate related investment risk. As a result some investments (mostly energy related) have been rejected based on climate change related considerations. Additionally, AP6 looks positively at companies that can provide products and services in a low-carbon economy, and companies with an ambitious approach to energy efficiency.

Process for climate-related risks is not integrated into our overall risk management
